

LAB ASSIGNMENT-1

REG NO	:	19BCS0012
NAME	:	NITHISH G
COURSE CODE	:	CSC3004
COURSE	:	VISUAL PROGRAMMING
DATE	:	07.03.2021

Lab Assignment Questions:

1. Study of Visual Basic Environment. (Toolbox controls in vb).
2. Calculate an area of rectangle and circle
3. Design and develop a program to perform arithmetic operation on two numbers (get the input values through textbox).
4. Design and develop a program to calculate Simple Interest with necessary input.
5. Design and develop a program to change form background color.(Use RGB functions and text boxes)
6. Use a first loop that will print Hello 5 times and another loop to print welcome to VB tutorial 4 times after every hello messages each on a separate line in the List box control. Use For loop
7. Write a VB program to display days of week i.e. Monday to Sunday using switch case statement.
8. Write to print the following series in List box control :
(Use all the loops)
 - i. 2,4,6,8-----20
 - ii. 20,18,16-----2
 - iii. 0,3,6,9---15
9. Write to print the following series and sum of series in List box control using while –end loop and all Do loops
 - i. 3,6,9..21
 - j. 19,18,..6

1. Study of Visual Basic Environment. (Toolbox controls in vb).

Select Objects	Select Objects is the only item in the Toolbox that doesn't draw a control. When you select it, you can only resize or move a control that has already been drawn on a form.
Label	Allows you to have text that you do not want the user to Change, such as a caption under a graphic.
TextBox	Holds text that the user can either enter or change.
ComboBox	Allows you to draw a combination list box and text box. The User can either choose an item from the list or enter a value in the text box.
ListBox	Use to display a list of items from which the user can choose. The list can be scrolled if it has more items than can be displayed at one time.
CheckBox	Creates a box that the user can easily choose to indicate if something is true or false, or to display multiple choices when the user can choose more than one.
OptionButton	Allows you to display multiple choices from which the user can choose only one.
ToggleButton	Creates a button that toggles on and off.
Frame	Allows you to create a graphical or functional grouping for controls. To group controls, draw the frame first, and then draw controls inside the frame.
CommandButton	Creates a button that the user can choose to carry out a command.
TabStrip	Allows you to define multiple pages for the same area of a window or dialog box in your application.
MultiPage	Presents multiple screens of information as a single set.
ScrollBar	Provides a graphical tool for quickly navigating through a long list of items or a large amount of information, for indicating the current position on a scale, or as an input device or indicator of speed or quantity.
SpinButton	A spinner control that you can use with another control to increment and decrement numbers. You can also use it to scroll back and forth through a range of values or a list of items.
Image	Displays a graphical image from a bitmap , icon , or metafile on your form. Images displayed in an Image control can only be decorative and use fewer resources than a PictureBox .

Question No. 2

AIM:

- Calculate an area of rectangle and circle using visual basic forms

FORM DESIGN:

EVENT PROCEDURE:

```
Private Sub Combo1_Click()
```

```
    If Combo1.Text = "Area of Rectangle" Then
```

```
        Frame1.Visible = True
```

```
    Else
```

```
        If Combo1.Text = "Area of Circle" Then
```

```
            Frame2.Visible = True
```

```
        End If
```

```
    End If
```

End Sub

Private Sub Command1_Click()

Dim l, w, area As Integer

l = Val(Text1.Text)

w = Val(Text2.Text)

area = l * w

Text3.Text = area

End Sub

Private Sub Command2_Click()

Dim radius As Double

radius = Val(Text4.Text)

radius = (radius * radius) * 3.14

Text5.Text = radius

End Sub

Private Sub Form_Load()

Frame1.Visible = False

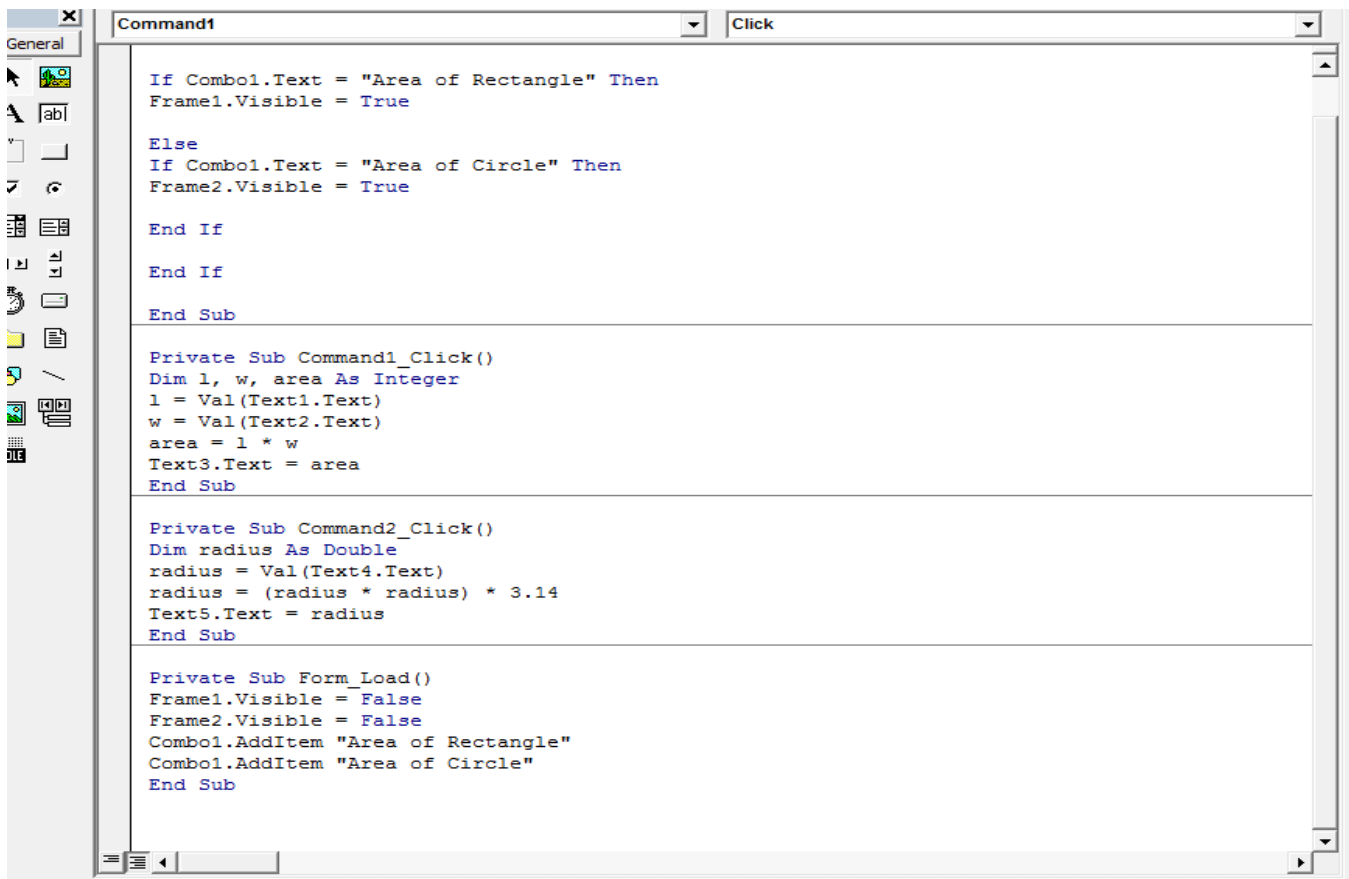

Frame2.Visible = False

Combo1.AddItem "Area of Rectangle"

Combo1.AddItem "Area of Circle"

End Sub

Source code:

```
General Command1 Click

If Combo1.Text = "Area of Rectangle" Then
    Frame1.Visible = True

Else
    If Combo1.Text = "Area of Circle" Then
        Frame2.Visible = True

    End If

End If

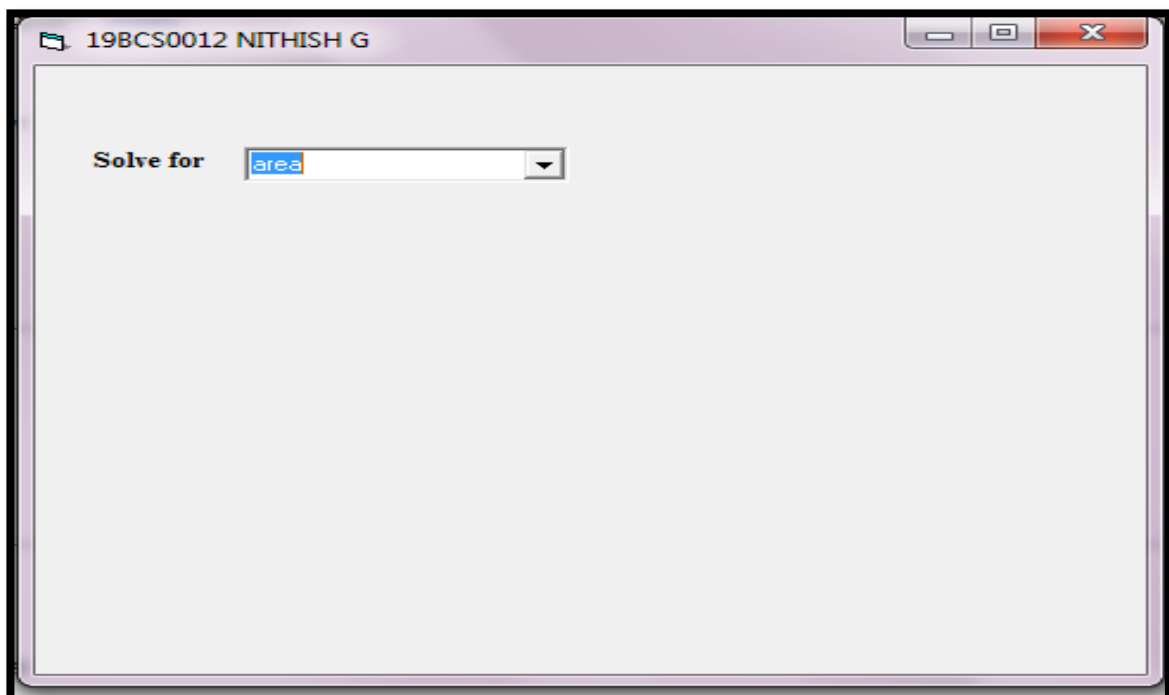

End Sub

Private Sub Command1_Click()
    Dim l, w, area As Integer
    l = Val(Text1.Text)
    w = Val(Text2.Text)
    area = l * w
    Text3.Text = area
End Sub

Private Sub Command2_Click()
    Dim radius As Double
    radius = Val(Text4.Text)
    radius = (radius * radius) * 3.14
    Text5.Text = radius
End Sub

Private Sub Form_Load()
    Frame1.Visible = False
    Frame2.Visible = False
    Combo1.AddItem "Area of Rectangle"
    Combo1.AddItem "Area of Circle"
End Sub
```

Output

19BCS0012 NITHISH G

Solve for

19BCS0012 NITHISH G

Solve for **Area of Rectangle**

Rectangle **Area of Rectangle**
Area of Circle

Area of Rectangle = $w * l$

l length

w Width

Area

19BCS0012 NITHISH G

Solve for **Area of Rectangle**

Rectangle

Area of Rectangle = $w * l$

l length

w Width

Area

19BCS0012 NITHISH G

Solve for **Area of Circle**

Circle

Area of Circle = Pie * (radius*radius)

r Radius

Area of circle

19BCS0012 NITHISH G

Solve for **Area of Circle**

Circle

Area of Circle = Pie * (radius*radius)

r Radius

Area of circle

QUESTION NO-3

AIM:

➤ To Design and develop a program to perform arithmetic operation on two numbers (get the input values through textbox).using visual basic forms

FORM DESIGN:

The screenshot shows a Visual Basic form window with the title bar '19BCS0012 NITHISH G'. The form has a light gray background and a blue border. At the top, the text 'Arithmetic operation on two numbers' is centered in a black, italicized font. Below this, there are two input fields. The first is labeled 'Enter 1st number' and the second is labeled 'Enter 2nd number'. Below the input fields, there are four buttons labeled 'Add', 'Sub', 'Mult', and 'Div'. At the bottom of the form, there are four empty text boxes corresponding to the results of the operations.

Code:

```
Public Class Form1
```

```
    Dim a, b, c As Double
```

```
    Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As
```

System.EventArgs)

```
Handles Button1.Click  
    a = TextBox1.Text  
    b = TextBox2.Text  
    c = a + b  
    TextBox3.Text = c
```

End Sub

```
Private Sub Button2_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button2.Click
```

```
    a = TextBox1.Text  
    b = TextBox2.Text  
    c = a - b  
    TextBox4.Text = c
```

End Sub

```
Private Sub Button3_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button3.Click
```

```
    a = TextBox1.Text  
    b = TextBox2.Text  
    c = a * b  
    TextBox5.Text = c
```

End Sub

```
Private Sub Button4_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button4.Click
```

```
    a = TextBox1.Text  
    b = TextBox2.Text  
    c = a / b  
    TextBox6.Text = c
```

End Sub

End Class

19BCS0012 NITHISH G

Arithmetic operation on two numbers

Enter 1st number

Enter 2nd number

19BCS0012 NITHISH G

Arithmetic operation on two numbers

Enter 1st number

Enter 2nd number

19BCS0012 NITHISH G

Arithmetic operation on two numbers

Enter 1st number

Enter 2nd number

19BCS0012 NITHISH G

Arithmetic operation on two numbers

Enter 1st number

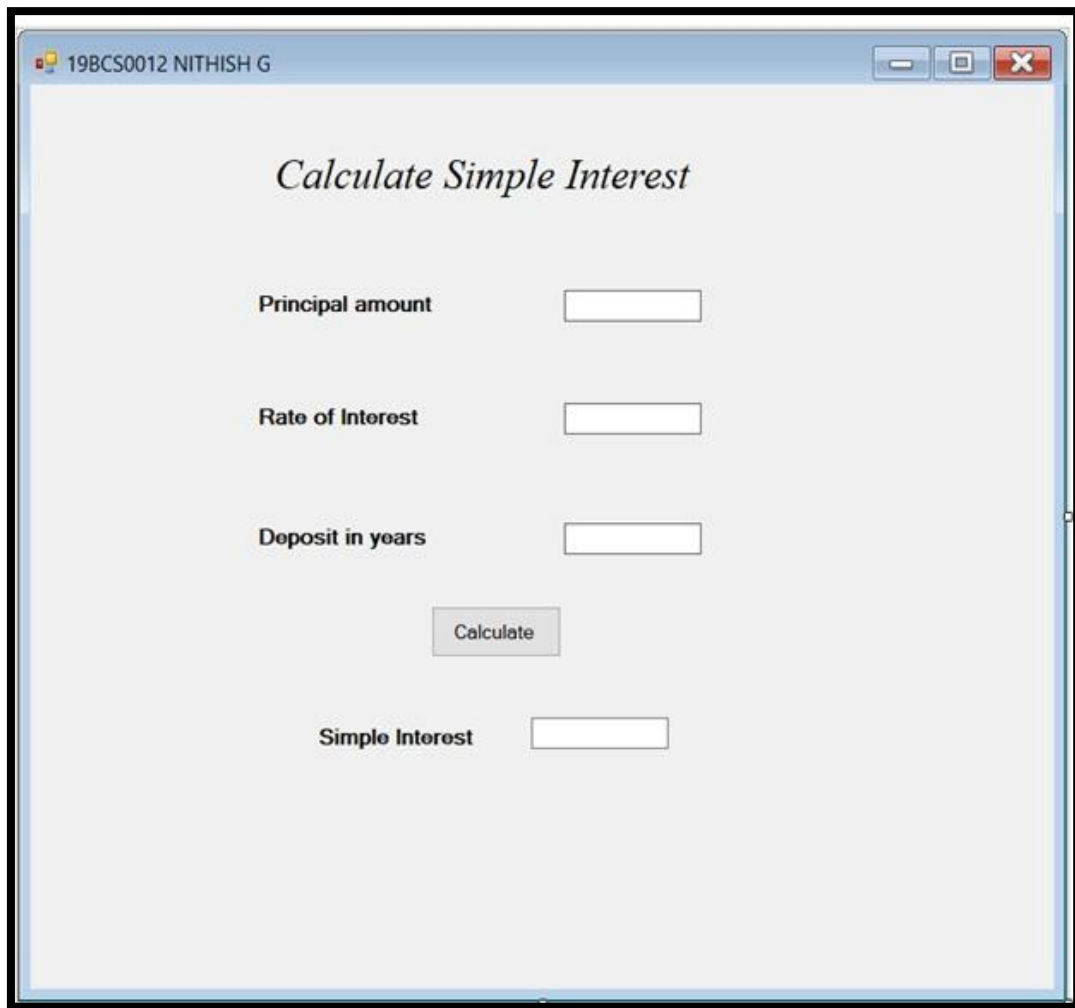

Enter 2nd number

Question 4:

AIM:

- To design and develop a program to calculate Simple Interest with necessary input using visual basic forms.

Design Form:

The screenshot shows a Windows application window titled "19BCS0012 NITHISH G". Inside the window is a form titled "Calculate Simple Interest". The form contains three input fields with labels: "Principal amount", "Rate of Interest", and "Deposit in years". Below these fields is a "Calculate" button. At the bottom of the form is another input field labeled "Simple Interest".

Event Procedures:

Public Class Form1

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button1.Click

Dim p, n, r, s As Integer
p = TextBox1.Text

```
n = TextBox2.Text  
r = TextBox3.Text  
s = (p * n * r) / 100  
TextBox4.Text = s
```

End Sub

End Class

Output:

19BCS0012 NITHISH G

Calculate Simple Interest

Principal amount

Rate of Interest

Deposit in years

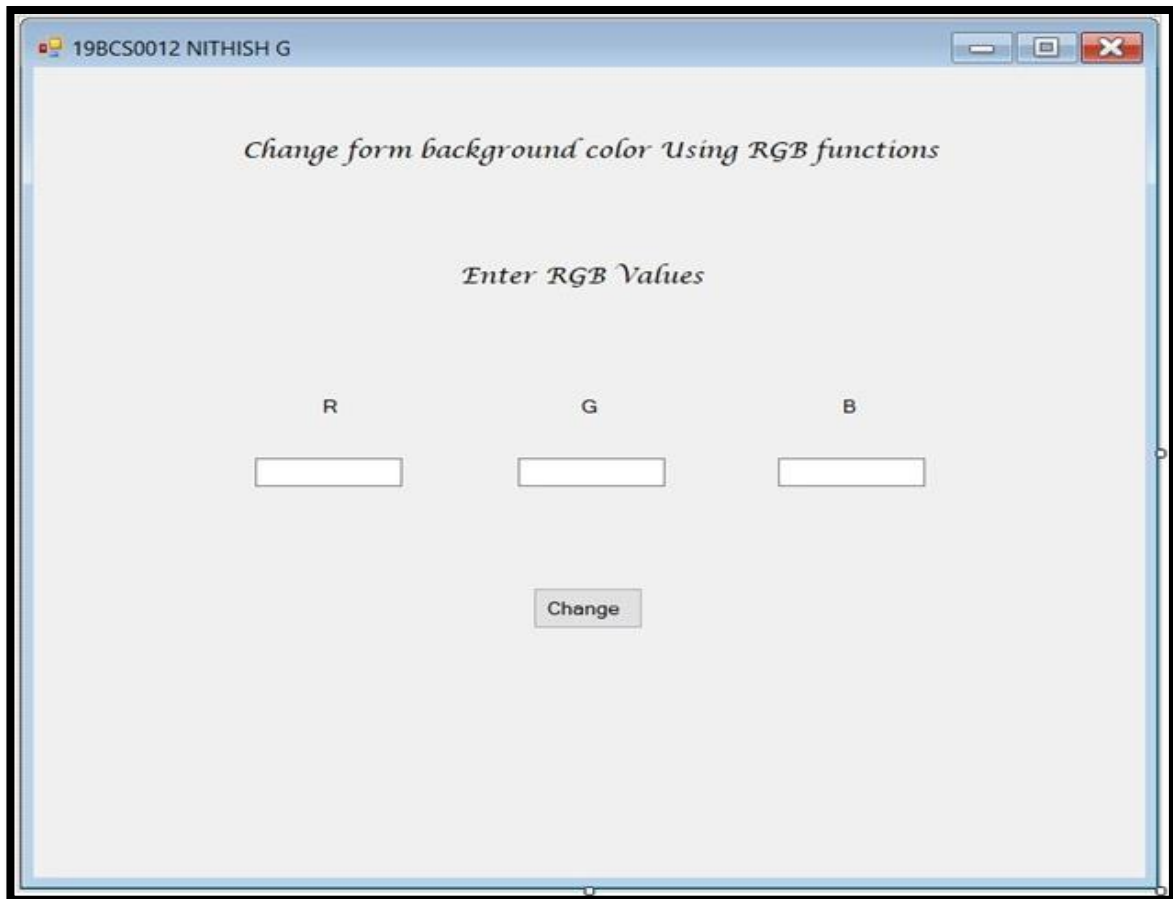

Simple Interest

Question 5:

AIM:

- Design and develop a program to change form background color.(Use RGB functions and text boxes)

Design Form:

The screenshot shows a Windows application window with the title bar '19BCS0012 NITHISH G'. The main content area has a light gray background. At the top, it says 'Change form background color Using RGB functions'. Below that, it says 'Enter RGB Values'. There are three text boxes labeled 'R', 'G', and 'B' for entering RGB values. A 'Change' button is located below the text boxes.

Event Procedures:

```
Public Class Form1
```

```
    Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button1.Click
```

```
        Dim r, g, b As Integer
```

```
        r = TextBox1.Text
```

```
        g = TextBox2.Text
```

```
        b = TextBox3.Text
```

```
        Me.BackColor = Color.FromArgb(r,
```

g, b)End Sub
End Class

Output:

19BCS0012 NITHISH G

Change form background color Using RGB functions

Enter RGB Values

R G B

0 255 0

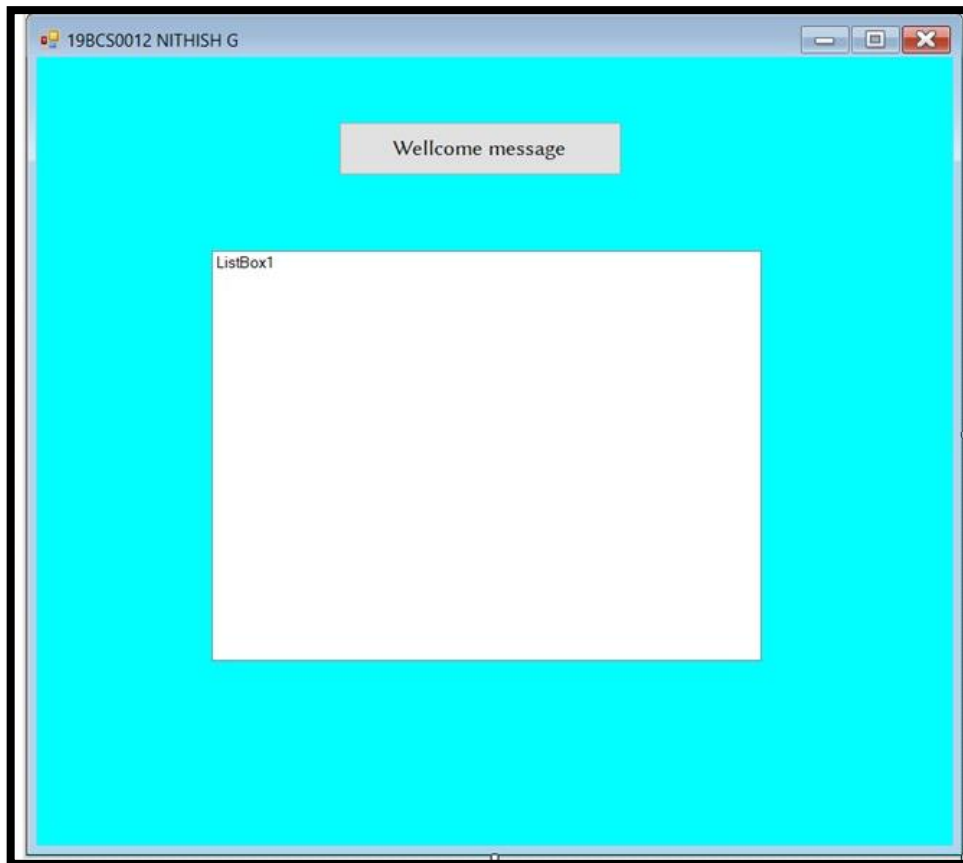

Change

Question 6:

Aim:

To print welcome to VB tutorial 4 times after every hello messages each on a separate line in the List box control print Hello 5 times.

Design Form:

Event Procedures:

```
Public Class Form1
```

```
    Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button1.Click
```

```
        Dim i, j As Integer
```

```
        For i = 0 To 5
```

```
            ListBox1.Items.Add("Hello ")
```

```
            For j = 0 To 4
```

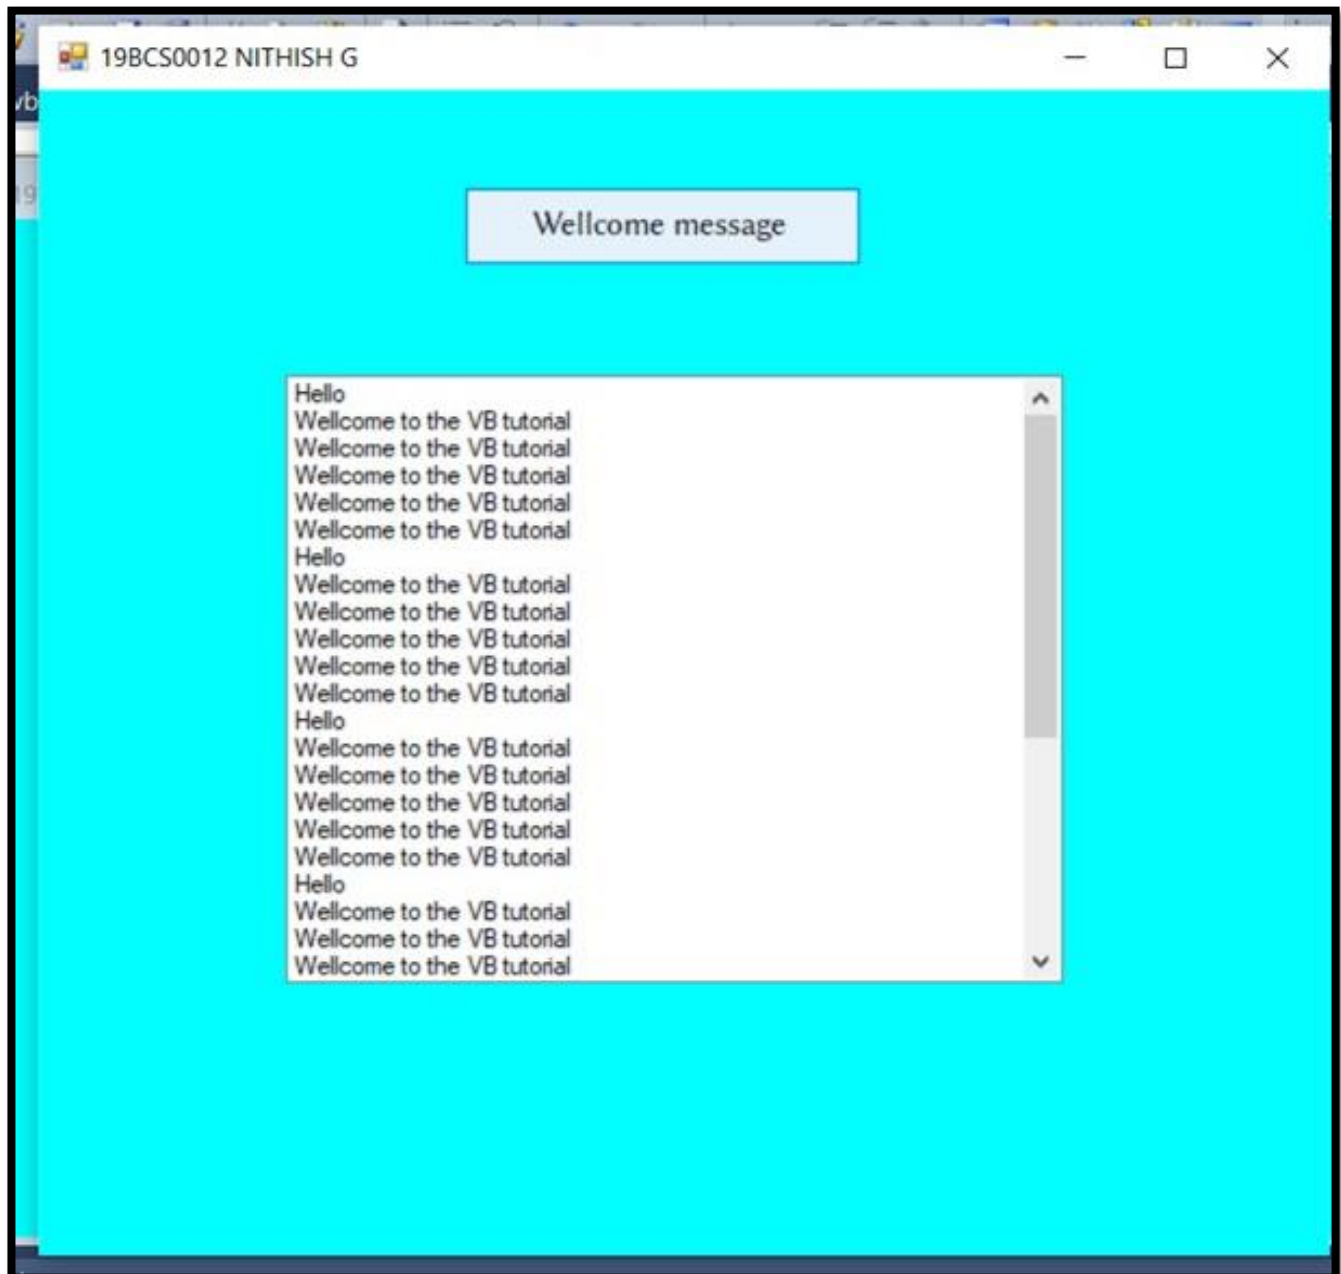

```
                ListBox1.Items.Add("Welcome to the VB tutorial ")
```

```
            Next
```

Next

End Sub
End Class

Output:

Question 7

Aim:

- Write a VB program to display days of week i.e. Monday to Sunday using switch case statement.

Design Form :

The screenshot shows a Windows application window with the title bar '19BCS0012 NITHISH G'. The main area of the window is yellow. It contains the text 'Display days of week' in a cursive font. Below this is the text 'Enter the day number' followed by a white text box. Further down is the text 'IT'S'. At the bottom center is a button labeled 'Check'.

Event Procedures

Public Class Form1

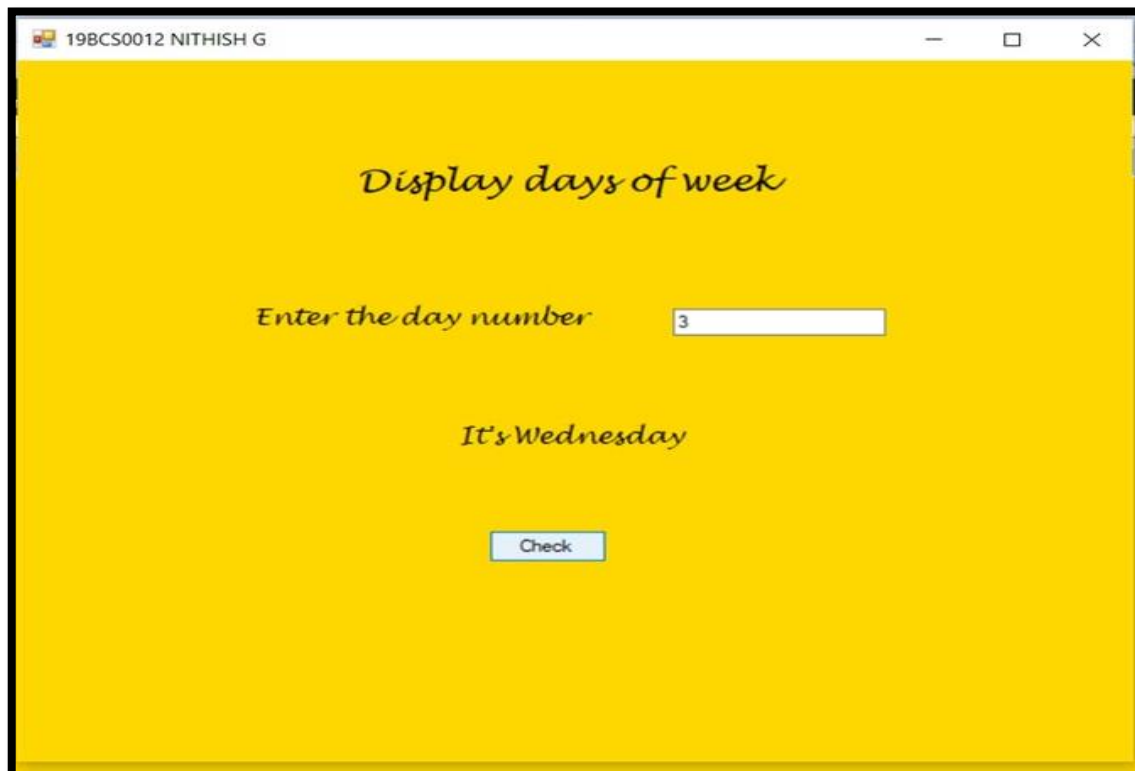

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button1.Click

Dim number As Integer
number =

```
TextBox1.TextIf
(number <= 7) Then
    Select Case number
        Case 1
            Label2.Text = " It's Monday "
        Case 2
            Label2.Text = " It's Tuesday "
        Case 3
            Label2.Text = " It's Wednesday
"Case 4
            Label2.Text = " It's Thursday "
        Case 5
            Label2.Text = " It's Friday "
        Case 6
            Label2.Text = " It's Saturday "
        Case 7
            Label2.Text = " It's Sunday "
    End Select
End If
Label2.Text = " please enter the a number from 1 to 7"

End Sub
End Class
```

Output

Note : if User gives invalid number it won't accept and gives message

19BCS0012 NITHISH G

Display days of week

Enter the day number

please enter the a number from 1 to 7

Check

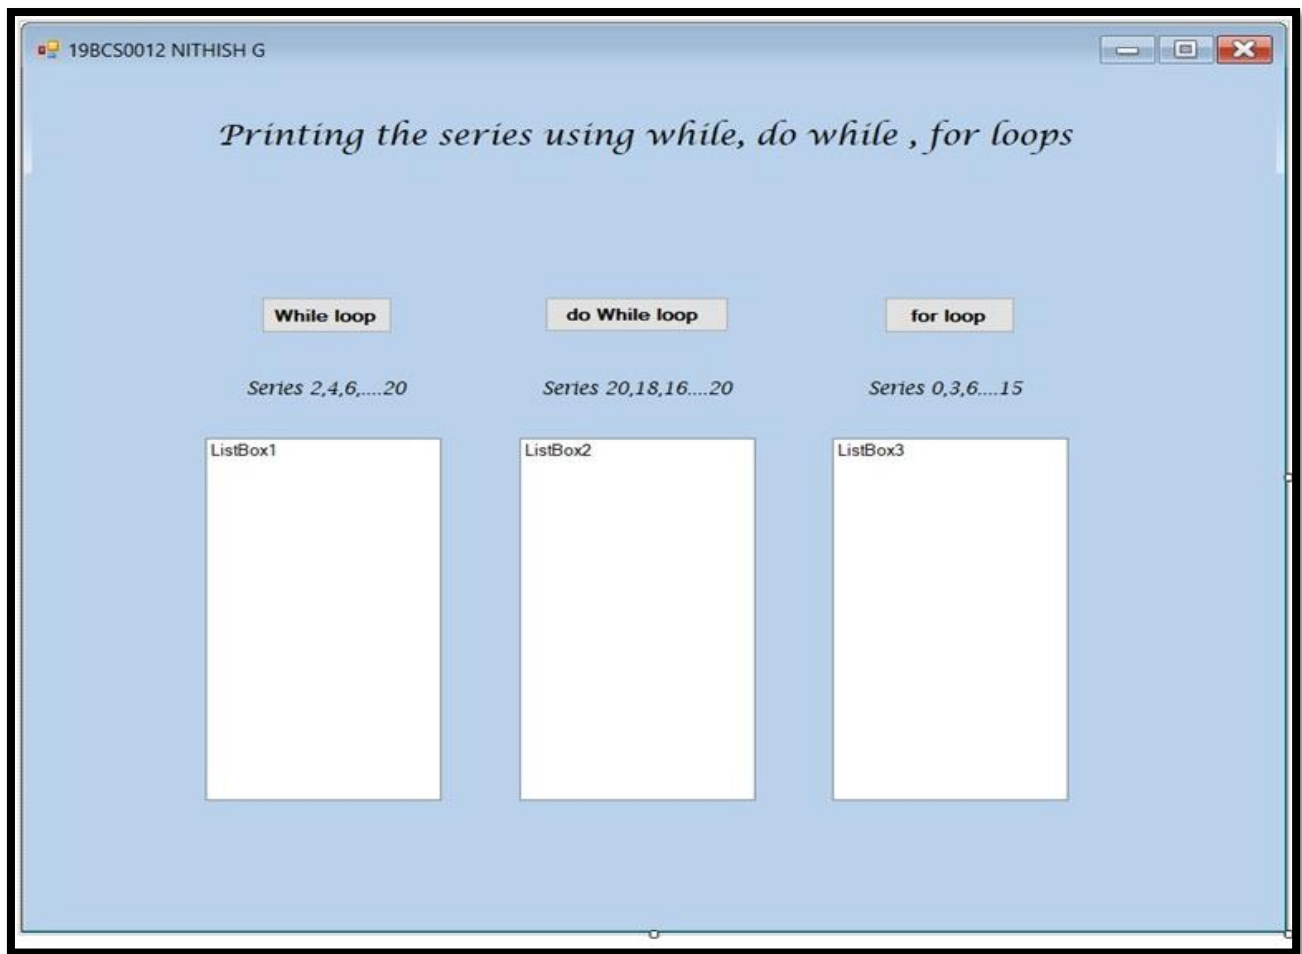

Question 8

Aim:

Print the following series in List box control :(Use all the loops)

- i. 2,4,6,8-----20
- ii. 20,18,16-----2
- iii. 0,3,6,9---15

Design form:

Event procedure:

Public Class Form1

Dim i, n As Integer

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

Handles Button1.Click n = 2

While (n <= 20)

```
ListBox1.Items.Add(n) n += 2
```

```
End While End Sub
```

```
Private Sub Button2_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs)
```

```
Handles Button2.Click n = 20
```

```
Do
```

```
ListBox2.Items.Add(n) n -= 2
```

```
Loop While (n > 2) End Sub
```

```
Private Sub Button3_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button3.Click
```

```
Dim i As Integer
```

```
For i = 0 To 15 Step 3 ListBox3.Items.Add(i)
```

```
Next End Sub
```

```
Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles MyBase.Load
```

```
Me.BackColor = Color.FromArgb(127, 255, 212) End Sub
```

```
End Class
```

Output form

19BCS0012 NITHISH G

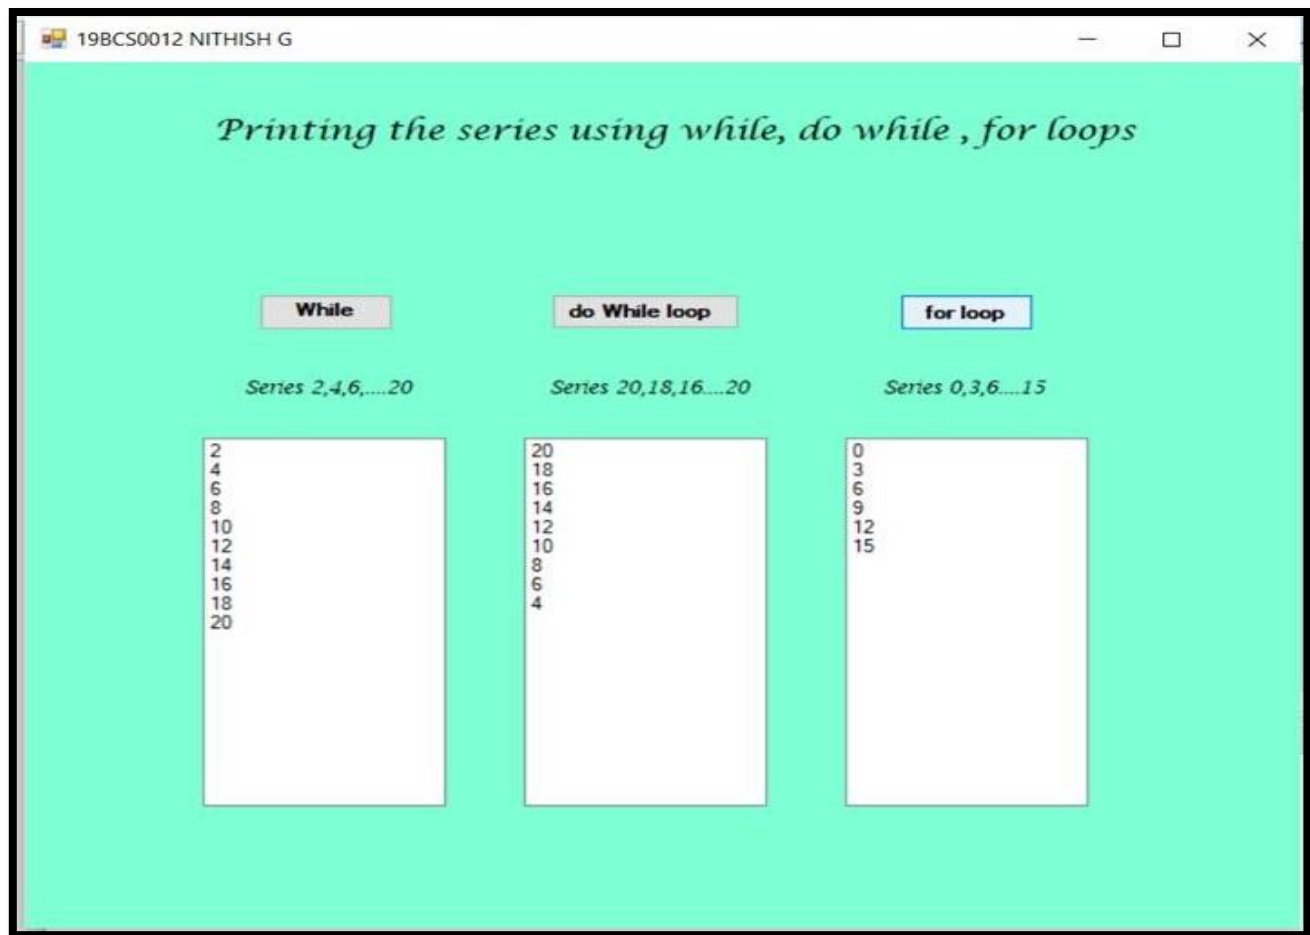

Printing the series using while, do while , for loops

While	do While loop	for loop
Series 2,4,6,...20	Series 20,18,16....20	Series 0,3,6....15
2 4 6 8 10 12 14 16 18 20		

19BCS0012 NITHISH G

Printing the series using while, do while , for loops

While	do While loop	for loop
Series 2,4,6,...20	Series 20,18,16....20	Series 0,3,6....15
2 4 6 8 10 12 14 16 18 20	20 18 16 14 12 10 8 6 4	

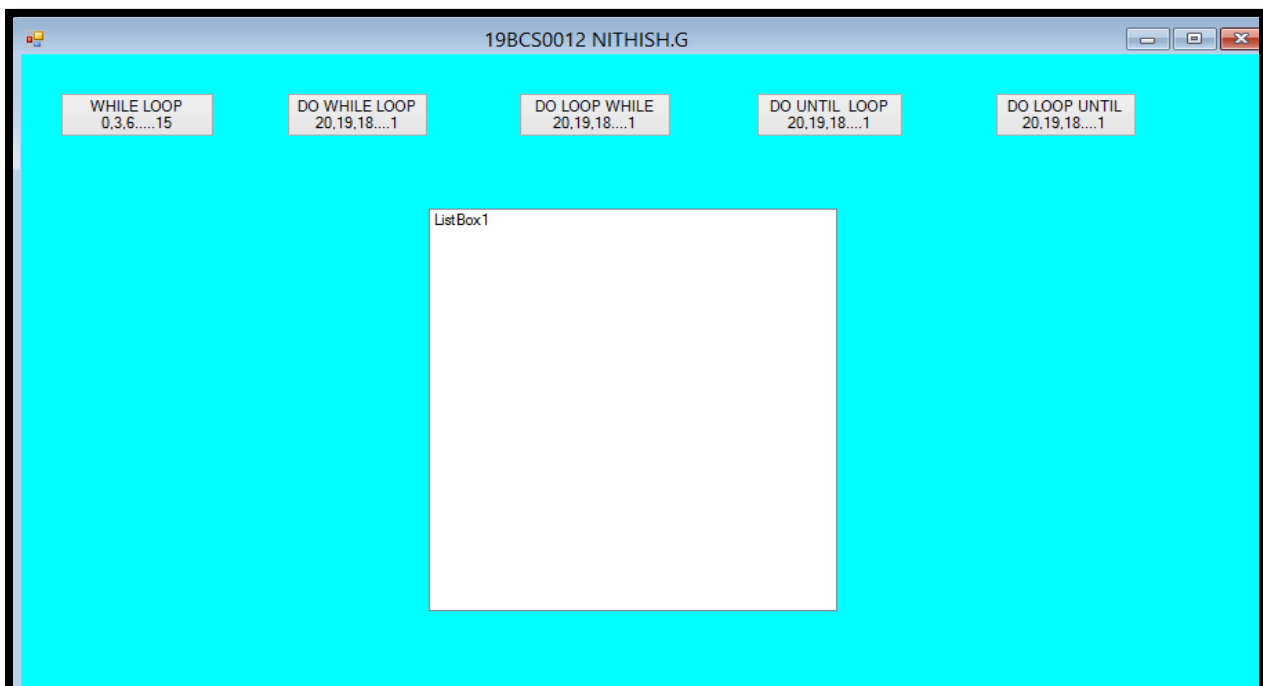

Question 9

Aim

- Write to print the following series and sum of series in List boxcontrol using while –end loop and all Do loops

Design Form

Source code:

Public Class Form1

Private Sub Button3_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button3.Click

ListBox1.Items.Clear() Dim A, SUM As Integer A = 0

While N <= 15

N += 3

SUM += N

ListBox1.Items.Add(N & vbTab & SUM) End While

End Sub

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button1.Click

ListBox1.Items.Clear() Dim N, SUM As Integer SUM = 0

N = 20

Do

SUM += N

ListBox1.Items.Add(N & vbTab & SUM) N- =1

Loop While N > 0 End Sub

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button1.Click

```
ListBox1.Items.Clear() Dim N, SUM As Integer SUM = 0
```

```
N= 20
```

```
Do While N > 0 SUM = SUM + N
```

```
ListBox1.Items.Add(N & vbTab & SUM) N- = N
```

```
Loop End Sub
```

```
Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button1.Click
```

```
ListBox1.Items.Clear() Dim N, SUM As Integer SUM = 0
```

```
A = 20
```

```
Do
```

```
SUM += N
```

```
ListBox1.Items.Add(N & vbTab & SUM) N-= 1
```

```
Loop Until N <= 0 End Sub
```

```
Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles Button1.Click
```

```
ListBox1.Items.Clear() Dim N, SUM As Integer SUM = 0
```

```
N = 20
```

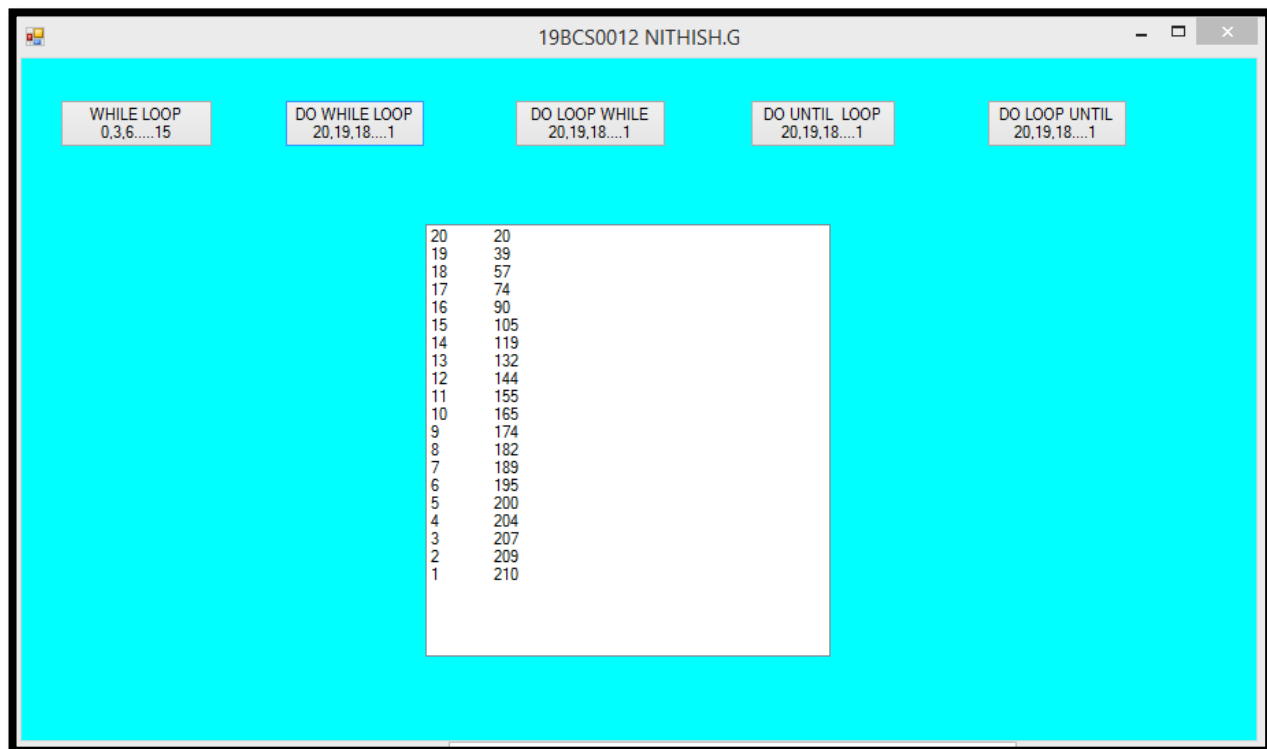

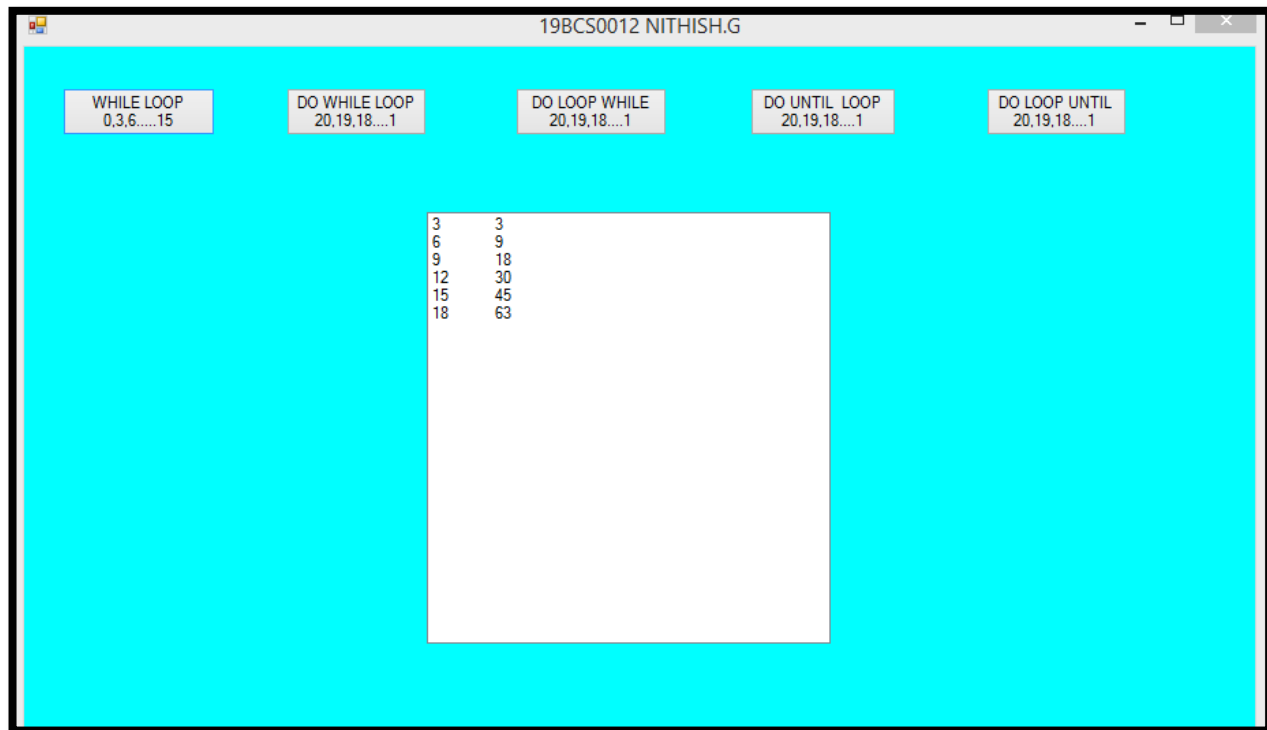

```
Do Until N <= 0 SUM = SUM + N
```

```
ListBox1.Items.Add(N & vbTab & SUM) N= N 1
```

```
Loop End Sub
```

End Class
