www.alamy.com

DEFINITION FOR INFORMATION TECHNOLOGY:

- **IT or information technology refers to the development, maintenance, and use of computer software, systems, and networks.** It includes their use for the processing and distribution of data. Data means information, facts, statistics, etc., gathered together for reference, storage, or analysis
- "Information technology is the design and implementation of computer networks for data processing and communication.

DAILY ACTIVITIES WHICH ARE INFLUENCED INFORMATION TECHNOLOGY:

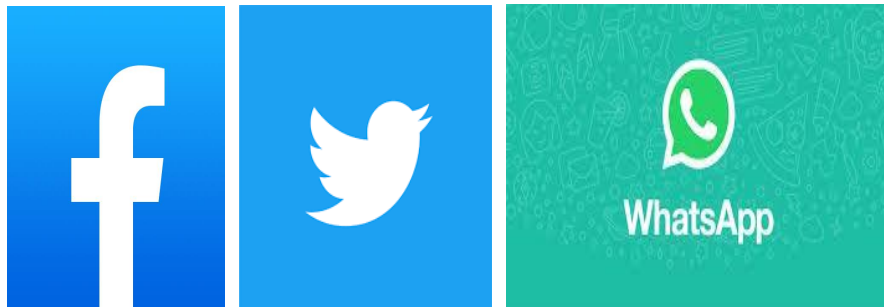

- Let's begin from morning every day we read or go through the news papers it was happened before some years but now every one using news application in their mobiles, laptops, computer ect..
For example news applications are dailyhunt

- If we go some where which is unknown place we use GPS Maps to track the location currently where we are in a particular area and it shows the correct way to reach our destination place
- It is also used to find roads which have more traffic and also shows other ways to reach our destination with low traffic roads

- Every day we make lot of communication with our friends, family, relatives etc... Through the applications like face book, what's app, twitter etc...

- Through information technology we enable to know lot of information through the search engines like Google, yahoo, fire fox etc...

ACTIVITIES WHICH ARE NOT INFLUENCED BY INFORMATION TECHNOLOGY:

- While we travel to some place by using transports like train, airplane, etc... at the time we won't use information technology,
- A person communicates to other person through physically he won't use information technology
- And also while we workout exercise in gym, driving vehicles etc...
- Without using information technology we unable to do lot of thing which need for life

Conclusion

Our every today life mingled with information technology it is more useful tool and powerful tool for our life

Activities which influenced by information technology list has more points than activities which are not using information technology
