Additional Activity
Date of Submission: 9/5/2020

1. **Create a Visual Basic application for Simple Book Shop Management System using Ms Access Database. Write a Visual Basic program to accept the following details of Book Store .Those details into the access database and delete the particular record of given book id.**

   Note : Your table must contain at least 10 details.

Table Fileds:

   i) **Book ID**
   ii) **Book Name**
   iii) **Book Cost**
   iv) **Book Author**
   v) **Edition**
   vi) **Publication**
   vii) **Number of Books**
   viii) **Total Number Books**

Note: The above fields are sample only. You can also add your own fields to your table. Students who apply the new idea to a given application will get good marks.
